WHAT EACH LEVER IS WORTH (CM $, 2026 YTD BASIS)

LEVER	TARGET	KMART
Earned per line-day to $2,500	**+$176K**	**+$86K**
Efficiency to 75%	**+$162K**	**+$61K**
CM per SMV-min to $0.0843 (standard)	**+$142K**	**+$118K**
CM per SMV-min to $0.10 (pointer 09 goal)	**+$410K**	**+$257K**

Levers overlap — do not add them up.

TARGET — IMPROVEMENT PLAN

1. Book TARGET-38 by body: jeans / shorts / jeggings lines stay on one product for 5+ days
2. Efficiency drive on TARGET lines: from 66.7% to 75% (layout, pre-production, WIP)
3. Cost every new order at ≥ 10¢ CPM; cut wastage 2% → 1%
4. Clear TARGET-37 overdue (21,678 pcs) and fix FFD on 25,923 TBA pcs

KMART — IMPROVEMENT PLAN

1. Re-price repeat boardshort / volley orders towards $0.0843 per SMV-minute
2. Keep dedicated lines through the Oct–Nov peak (158,286 pcs)
3. Lift efficiency 68.4% → 75% on long runs (target $2,500 / line-day)
4. Get shipped qty from Kmart-002 file each week (now assumed)

Note: Revenue tab = Buyer wise average CM & earned report (11-Oct, sheet 2026, 01 Jan – 10 Oct 2026) and Buyer KPI ranking. $ impact = simple pro-rata on 2026 earned so far (TARGET $1,298,800 · KMART $629,188); levers overlap, so do not add them up.

POINTER 09 — FOR MANAGEMENT

Raising CM further — what we need from production

01

Increase CPM from 8¢ to 10¢

Target for the Target account. To increase CPM further, we need the points below to be considered by the production team.

02

Reduce cutting wastage from 2% to 1%

Saves more fabric, which will be utilised for future orders.
